# FIFTH ANNUAL REPORT

---

OFFICE BOARD OF STATE PRISON COMMISSIONERS,

Helena, Montana, December 2nd, 1895.

To His Excellency, J. E. RICKARDS, Governor of Montana:

In accordance with the provisions of the law, we submit herewith our Fifth Annual Report of the affairs of the Prison for the fiscal year ending November 30th, 1895.

The Board feels a pardonable pride in the advancement which has been made in the condition of the Prison during the past three years. Many valuable improvements have been added for the comfort of the prisoners, as well as for their additional safety. The grounds are now well graded, and surrounded by a substantial stone wall, which was more fully described in our last report. Supplying a long felt want, the wooden shacks and buildings which contained the tailor-shop, shoe shop, meat shop, laundry, etc., have been torn down and replaced by a comfortable, two-story brick building, the second floor of which contains a good well-ventilated hospital, also a dining-room sufficient to accommodate 425 prisoners at one time. This last addition is certainly a change for the better, as heretofore the tables have been placed in the corridors just outside the cells, and more or less of the odor from the food was likely to remain in the building. These improvements have been made wholly by convict labor.

The food has improved much during the past two years. It is well cooked, ample in quantity, and of sufficient variety to promote good health. There have been no diseases of an epidemic or contagious character, the only illness which has occurred having been such as naturally results from a sedentary life and atmospheric changes.

During the construction of the wall but one serious accident occurred. One of the stone-cutters had the misfortune to lose the sight of one eye. This was purely accidental and was not due to negligence on the part of anyone. As the Prison Physician did not have the necessary instruments to operate upon the prisoner, he was taken to Butte for treatment, but without success. Therefore, at the recommendation of the Board of Prison Commissioners, he was granted a diminution of seven months and nineteen days from his sentence, and was released from the Prison.

If we may judge from our experience during the past two years, the State will need to expend no more money for labor for ordinary construction in the Prison. The convicts have shown their capacity to meet all such requirements in a thoroughly satisfactory manner. During these two years the facts have been demonstrated that constructive work in the Prison can be thoroughly well done by convicts, with marked economy and consequent advantage to the State. Solely by the prisoner's service, except some skilled talent engaged in supervision, the extensive construction of the massive stone wall surrounding the Prison grounds was this year carried on to completion. This will ever stand as a monument to prison labor. The imperative need of enlarged and substantial quarters for the accommodation of the various shops run in connection with the Prison, was promptly met by the Contractors, who turned to the prisoners for the necessary labor, asking from the State the sum of One Thousand Dollars as a partial payment of materials to be used in the construction of this building.

The building is two stories high, one hundred and fifty feet long by forty feet in width, with a projecting center portion, which is forty feet wide by sixty feet deep, the whole covering an area of 6,800 square feet.

The foundation walls are of granite, three and one-half feet thick and from four to five feet deep. Red brick is used for the superstructure, pointed off with white mortar.

Window and door sills, caps, copings, battlements and trimmings are of white granite. All partitions are of brick, resting on granite foundations. The floor of the first story is partly stone flagging, from three to five inches in thickness, laid

in cement, and partly brick paving, with a covering of cement an inch and a half in thickness.

The north end of the building is occupied by the women's department, and contains three rooms on the first floor, with stair-case leading to three rooms, and bath-room on the second floor. This department is separated from the balance of the building by a sixteen-inch brick fire-wall running through to the roof.

The first story of the building proper is twelve feet high and contains:

Store Room, 684 square feet.

Butcher Shop, 494 square feet.

Tailor and Shoe Shop, 1102 square feet.

Blacksmith, Tin and Carpenter Shop, 1102 Square feet.

Wash House, 988 square feet.

Kitchen, 1140 square feet.

The second floor contains a Dining Hall, 38x104 feet (3952 square feet), with ceiling fifteen feet high. A large elevator connects this Dining Hall with the kitchen below. A separate stair-case on the south end of the building leads to the Hospital 20x30 feet in size, with Doctor's Office and Drug Room connecting.

On the south end of the Main Building, but not connected with the building, is a Bakery, one story high, with a furnace, the oven of which measures fourteen by fourteen feet on the inside. Included in this building is a Flour Store Room, six by sixteen feet, and Kneading Room ten by twenty feet in size.

Following the tables relative to the prisoners will be found an estimate of the amount of material used in the construction of these improvements, and the cost of the same.

During the two years' work on the prison wall, the convicts, whose unskilled labor has been utilized, have rendered 39,623 days' service. The saving to the State by the utilization of the labor of these men can, of course, be only approximately estimated. Estimating each convict's service at \$1.00 per day, which is a low estimate, represents a saving of \$39,623.00.

As yet no provision has been made for the discharged convict, although the plan of giving him work while in the Prison has assisted him materially, inasmuch as it hardens his muscles

and prepares him for manual labor immediately upon his discharge. But at present the greatest obstacle in the way of the discharged convict is the difficulty of his procuring employment that will support him. During the past year work has been difficult to procure all over the country, and if the businessman feels this depression, how much more does the discharged convict suffer from it, leaving the Prison with the taint of that life upon him. The most critical period in the life of a convict is when he turns his back on prison walls.

Rigid, exacting and impartial discipline, plain, well-cooked food, and regular hours of labor of some sort that may assist the convict, upon his discharge, to find employment, is the reformatory method which experience teaches will produce the best results. In many prisons physical training is considered a potent factor in the reformation of prisoners. A good system of gymnastics, or military drill would do much towards the physical development. Every prisoner, though denied his liberty, has a right to every protection for the preservation of his health, so that, when his sentence expires he may have health and strength with which to support himself.

Some measures should be taken which will enable all prisoners to be employed for at least a few hours daily. To confine a prisoner in a prison without any exercise other than a few minutes walk in the prison yard, is ruinous to his physical, mental and moral condition. It would seem hardly just on the part of the State to sentence men to hard labor and then, by reason of the limited facilities for work afforded, keep them in enforced idleness.

The past year has been so characterized by dullness in business that large numbers of commitments might naturally have been expected. By looking at the record it will be seen that more persons have been committed to the prison this year than during any previous year in the history of the Prison.

### EASTERN STATE PRISON.

At the close of the fiscal year ending December 1, 1894, there was but \$261.26 in the treasury available for carrying on and completing the work at the Eastern State Prison which could

be applied to the payment of the estimates of the contractor.

The Legislature, after the passage of the general and special appropriation bills amounting to the sum of \$625,185.37, (which was largely in excess of the revenue for the year 1895) made an appropriation for this Prison of \$30,000 for the year 1895, and \$20,000 for the year 1896, which bill was approved March 19, 1895, and was the last bill signed by the Governor carrying any appropriation.

Immediately after the adjournment of the Legislature, the question was submitted to the State Board of Examiners whether or not any appropriation for the Eastern State Prison would be available for 1895 and the State Board of Examiners subsequently and in the month of March informed the Board of State Prison Commissioners that no part of the appropriation for the year 1895 would be available.

On April 22, 1895, Fisk J. Shaffer, the contractor( presented to the Board of State Prison Commisssoners his estimate and statement in relation to settlement, and it was agreed that the contractor should try to raise the money necessary to go on with the work and complete the building, as he thought the citizens of Billings would assist in this matter and provide him with money on the certificates the Board had decided to issue, as the work progressed.

On April 23, 1895, Mr. A. L. Babcock, of Billings, appeared before the Board to discuss plans for raising the money. Nothing definite in this direction was done at this meeting.

On May 1, 1895, the contractor appeared before the Board and demanded an immediate settlement and a release from his obligations under the contract, and as nothing further had been heard from Mr. Babcock, or the citizens of Billings, the Board wired Mr. Babcock as follows: "We will act finally on penitentiary contract at ten o'clock to-morrow morning. If parties at Billings want work continued on terms as proposed, notify us before that time."

On May 2, 1895, the Board received the following telegram signed by Mr. Babcock: "Our people will endorse certificates and offer any security necessary. Hope Board will not be in such haste as to shut us out. Have written you." On this date also the Board received a letter from Mr. Babcock in much

the same tenor as that of the telegram from him, and with nothing therein of a more definite or explicit character. Thereafter and on the same date, the following telegram was sent to Mr. Babcock: "The Board has this alternative presented, to-wit: either approve the last estimate or the contract will be annulled. It is too late to argue this question as the Board has had this matter under consideration for thirty days. If you will act as proposed you must be here by the next train with the necessary authority and power to act for others."

Mr. Babcock did not appear in response to this telegram but on May 3, 1895, Mr. E. D. Edgerton, for Mr. Babcock, came before the Board to request that more time be given, and that no haste in the matter be taken by the Board.

On May 4, 1895, the contractor came before the Board and stated in the most positive language, that he would not do any more work on the building, and the Board therefore, at this meeting, ordered that a warrant for \$4,500 be drawn in favor of the contractor upon the Eastern State Prison Fund, and that certificates of indebtedness for the balance due the contractor upon his last estimate be issued to him in the sum of \$7,569. The warrant was drawn and certificates issued to the contractor in accordance with the above order.

It afterwards appearing to the satisfaction of the Board that Mr. McCalman, representing the State, had underestimated the amount due the contractor in the settlement just had with him, (Mr. McCalman having made another trip to Billings for the purpose of revising and correcting his former report.) The Board, on August 30th, 1895, ordered that another and final certificate of indebtedness be issued to the contractor in the sum of \$817.95, and this was done.

Table No. 4 shows the amount paid out and expended for work in the construction of the Eastern State Prison, which also includes the amount paid Fisk J. Shaffer in settlement for labor performed and materials furnished at the final settlement when it was ascertained there were no funds available to complete the prison at Billings. In the settlement with the contractor the Board made an estimate of the entire amount due under the contract at the time work ceased on the building, and settled with Mr. Shaffer in full, and at the same time ab-

solved the contractor from any further liability on his contract, and his sureties from any further liability on his bond. Whereupon the building in its present condition, with all the unused materials, was turned over to the Board of Prison Commissioners, and taken possession of by the Board.

On May 17, 1895, Mr. McCalman went to Billings with instructions from the Board to carefully cover all materials, brick and the walls of the building to guard them from trespassers, and to protect them from the elements.

On May 22, 1895, Mr. Frank D. Baker was appointed by the Board as custodian of the buildings and materials at the Eastern State Prison, at a salary of \$50.00 per month.

Respectfully submitted,

J. E. RICKARDS,

L. ROTWITT,

H. J. HASKELL.
